Dear Patient:

We want to inform you how we get to you the results of tests that we may order for you. If you have been or will be scheduled for a test at a laboratory, imaging center, hospital for a 24 hour EEG or at our neurodiagnostic suite in Albany [for an EEG, BAEP, VEP or SEP], this information is important to know.

On average it will take **two to six days** before we have the actual results of the tests, or the radiology films if your physician wishes to review them. It then will take your doctor one day to review the results. If at any time in that process a serious problem is discovered, you will be called directly by your doctor or his nurse as soon as we are aware of the problem. In such situations, we often hear within 48 hours from the testing center.

If the results are not serious, you will receive by mail a summary of your test result with any further instructions from your physician. You can expect this letter about **ten days** after your test. If you have any questions about the letter you receive from our office, you are free to call and speak to one of our nurses.

Thank you for your understanding in this matter.

Sincerely,

Christopher S. Calder, MD, Ph.D.  
James R. Storey, MD  
David E. Hart, MD  
James P. Wymer, MD, Ph.D.  
Bruce A. Beesley, MD
